EMBARGO: MARCH 21, 2023 | 9AM CST / 3PM CET

RETAIL AVAILABILITY: MARCH 2023

PRODUCT INTRODUCTION

During a 6-year history of Eagle and 11-years of the dedicated 1x drivetrain, we've refined the facets of the system we control. Even with this legacy, we wondered whether a new level of performance was possible, not just for SRAM's benefit, but to help riders and improve the ride as a whole. So, we rethought the entire interface between frame, wheel, and drivetrain. Eagle Transmission is a first-of-its-kind approach to the mountain bike drivetrain that sets a new bar and new expectation to the whole system.

This is the dream delivered.

Eagle Transmission has been designed and engineered into tangible technology for the world's most demanding riders. Built around the universal constant of the wheel axle itself, Eagle Transmission is a radically robust, fully integrated and interdependent wireless transmission that literally changes how we ride. It simplifies, strengthens, and extends lifespan to new limits. It uses no derailleur hanger or adjustment screws and lets you shift flawlessly under maximum power. Eagle Transmission drops a seismic shift on what it means to shift a mountain bike.

DERAILLEURS

XX SL EAGLE TRANSMISSION DERAILLEUR

RD-XX-SLE-B1

The XX Eagle Transmission Derailleur foundationally changes the relationship between cassette and derailleur. Engineered as integrated, interdependent transmission components, the T-Type derailleur mounts around the wheel axle itself, contacting the cassette directly with a first-of-its-kind Hangerless Interface. Its game-changing Full Mount attachment method creates a far stronger connection and grips both sides of the frame. The new transmission derailleurs feature the same intuitive pairing and set-up procedure as our Eagle AXS derailleurs. It features an overload clutch and a tucked-in profile, removing all but what's needed to win. It accommodates common maintenance and to further its race-day performance, comes with a lower pulley called Magic Wheel that keeps spinning if an object becomes lodged. Additionally, the XX SL Eagle Transmission derailleur features a carbon cage, a replaceable outer link and b-knuckle cover in a sleek black colorway. This is unrivaled shifting performance, light weight and unprecedented strength. The XX SL Eagle Transmission derailleur delivers.

Its game-changing Full Mount attachment method creates a far stronger connection and grips both sides of the frame. The new transmission derailleurs feature the same intuitive pairing and set-up procedure as our Eagle AXS derailleurs. A tucked-in profile houses replaceable skid plates that enhances dependability in high-pressure racing environments. To further its performance, the lower pulley called Magic Wheel keeps spinning if an object becomes lodged. Additionally, the XX Eagle Transmission derailleur features an overload clutch, accommodates common maintenance and features that real world riders really appreciate. This is unrivaled shifting performance, unprecedented strength. The XX Eagle Transmission derailleur delivers.

X0 EAGLE TRANSMISSION DERAILLEUR

RD-X0-E-B1

Whether on the starting line or not, the XO Eagle Transmission (T-Type) derailleur brings competition-tested prowess to riders who let their riding prove everything. Engineered as integrated and interdependent transmission components, the XO Eagle Transmission derailleur mounts around the wheel axle itself, contacting the cassette directly with a first-of-its-kind Hangerless Interface. This foundationally changes the entire relationship between cassette and derailleur. Beyond that, its Full Mount attachment method creates a far stronger connection that grips both sides of the frame. The new transmission derailleurs feature the same intuitive pairing and set-up procedure as our Eagle AXS derailleurs. While out on the dirt, it's no exaggeration to say the XO Eagle Transmission derailleur marks a seismic shift in robustness, allowing for common maintenance that serious riders demand. Featuring an overload clutch that boosts resiliency and a tucked-in profile that houses protection covers on the B-knuckle and outer link that are fully replaceable, or upgradeable to the XX skid plate. Bottom line, the XO Eagle Transmission derailleur changes the game while filling the need for premium componentry that's been made to last.

CONTROLLERS

AXS POD CONTROLLERS

EC-AXS-POD-B1

The AXS Pod transforms the crucial act of rider inputs into a vastly more personal experience for all of your AXS controls. Pod offers lighter weight than Eagle Ecosystem AXS Controllers, updated ergonomics and a vastly superior range of adjustability. Featuring a "click and fire" two-button design, with an intuitive action that requires the ideal amount of rider input to activate. Plus, it allows riders to personalize button assignments through the AXS App and features lever caps with subtle grip. With a unique flippable design, AXS Pods can be mounted left- or right-handed it's one component, with a world of possibilities.

—

Lighter weight, better and more adaptable ergonomics, superior adjustability, premium finish

All-new "click and fire" two-button design

Intuitive and straightforward action requiring the ideal amount of rider input

Personalize paddle options for complete customizability via the AXS App
Deluxe version allows for interchangeable concave and convex buttons

CRANKSETS

XX SL EAGLE CRANKSET

FC-XX-SL-D1

With multiple World Championship medals, EWS wins and Olympic gold medals to its name, our XX Eagle cranks set the standard, now the XX SL Eagle DUB Crank is the pinnacle. Inside, it has been engineered with an ultra-strong but ultra-light design that utilizes carbon fiber with a hollow core – still the lightest ISO certified crank on the market, maximized for title winning stiffness. Now pair it with the remarkable new XX SL Eagle Transmission (T-Type) direct mount chainring, and the spotlight turns from its performance to its appearance, because it absolutely looks like nothing you've ever seen before.

X0 EAGLE CRANKSET

FC-X0-D1

If the following sounds like hyperbole, wait until you see the X0 Eagle Transmission Crankset with your own eyes. Literally the most advanced aluminum crankset SRAM has ever made, it is utterly unique and simply striking. Bringing serious riders the exact sort of legitimate performance X0 stands for, courtesy of a ground-breaking all-aluminum design with a perfectly balanced stiffness to weight ratio.

Available with a bash guard option, it's also Power Meter ready. Sitting firmly atop an unquestionable apex of crankset advancement, the X0 Eagle Transmission Crankset is quite literally the epitome of X0.

XX EAGLE E-MTB CRANKSET ASSEMBLY

FC-XX-PA-D1

With multiple World Championship medals, EWS series wins and Olympic gold medals to its namesake, the pedigree of XX is well established in the court of elite racing. The XX Eagle E-MTB Crank takes from that race-winning lineage and is optimized for E-MTB use. Carbon fiber engineered with a foam core to give both incredible strength and maximized stiffness under the high torque environment of E-MTB. Paired with the new XX Eagle Transmission (T-Type) direct mount chainring, performance and design aesthetic blend together to provide our most premium, performance driven crank arm.

POWER METERS

XX SL EAGLE AXS TRANSMISSION POWER METER CRANKSET

FC-XX-SLP-D1

The XX SL Eagle AXS Transmission power meter crankset boasts our new XX SL crankarm with an integrated power meter to record and deliver live, accurate power readings to your head unit. Utilizing an all-new spider-based design, this is our most accurate, high performing power meter. Our new spider design uses a proprietary chainring mount system which has allowed us to reduce weight without compromising reliability. A dual sided power measurement system calculates total watts, it's subtle, lightweight, and boasts unbeatable battery life. It is also compatible with the RockShox Flight Attendant system, allowing for total connectivity between all AXS enabled components. No-compromise, high-performance data delivery giving you an edge over the competition.

—

All new design with proprietary chainrings, available in 32-38T

Compatible with RockShox Flight Attendant

Unique, groundbreaking design integrated with our lightest crank ever

+/-1.5% accuracy

User replaceable CR2032 battery 200-hour battery life

Bluetooth low energy technology wireless data transfer

MagicZero - automatically checks and recalibrates your power meter as you ride

AxCad - no cadence magnet required

10K temperature compensation

Waterproof (IPX7 waterproof to 1 meter for 30 minutes)

XX EAGLE AXS TRANSMISSION POWER METER CRANKSET

FC-XX-P-D1

The XX Eagle AXS Transmission power meter crankset utilizes our World stage proven XX crankarm with a subtly integrated power meter to record and deliver live, accurate power readings to your head unit. We achieve this by utilizing what we call “DUB-PWR” – a unique design that elegantly houses Quarq’s reliable and accurate power measurement inside the DUB crank spindle itself. Measuring left-side power to calculate total watts, it’s subtle, lightweight, compatible with any chainring setup, and boasts unbeatable battery life. It is also compatible with the Flight Attendant system, allowing for total connectivity between all AXS enabled components. No-compromise, no-fuss data delivery giving you an edge over the competition.

CASSETTES

XX EAGLE SL TRANSMISSION CASSETTE

CS-XS-1299-A1

The XX SL Eagle Transmission (T-Type) Cassette is a major reason why Eagle Transmission offers the best-ever inboard and outboard shifting performance under load. Thanks to its full X-Sync design, the harder you pedal, the better it shifts. Literally. Our lightest Eagle cassette in history lasts far longer and delivers more precision. Its new-gen design is fully machined,

hardened steel X-Dome architecture for gears 4-12 and an ultra-lightweight, all-aluminum Spider Cog for gears 1-3. Engineered as integrated and interdependent transmission components, the XX Eagle Transmission Cassette and derailleur contact directly, ensuring perfect alignment on every bike. From its massive 520% gear range, the 52 tooth cog steps down with improved gear progression with 44 and 38 tooth cogs in the low end (compared to the Eagle drivetrain 10-52-tooth cassette). Featuring a clearly marked Setup Cog, install is both simple and fool-proof.

—

New-gen design is our lightest ever 10-52T cassette due to the ultra-lightweight, all-aluminum Spider Cog

Full X-SYNC for best-ever inboard and outboard shifting performance under load

Optimized gear steps on low end

55mm chainline compatibility for more moderate chain angle, longer wear and greater precision

Setup Cog for fool-proof set up

Utilizes well accepted and broadly available XD driverbody

XX EAGLE TRANSMISSION CASSETTE

X0 EAGLE TRANSMISSION CASSETTE

CS-XS-1295-A1

The X0 Eagle Transmission (T-Type) Cassette is a major reason why Eagle Transmission offers the best-ever inboard and outboard shifting performance under load. Engineered as integrated and interdependent transmission components, the X0 Eagle Transmission Cassette and derailleur contact directly, ensuring perfect alignment on every bike. Beyond its unique and stunning Dark Polar finish and electroless nickel plating for incredible resistance to corrosion and wear, its full X-Sync design literally means the harder you pedal, the better it shifts. Its strength is further proven by its full approval for E-MTB use. It's been built for a 55mm chainline for even more durability and precision thanks to milder chain angles throughout the full range, low to high. From its massive 520% gear range, the 52 tooth cog steps down with improved gear progression with 44 and 38 tooth cogs in the low end (compared to the Eagle drivetrain 10-52-tooth cassette). What else? It has a clearly marked Setup Cog, making install both simple and fool-proof.

CHAINS

XX EAGLE SL TRANSMISSION FLATTOP CHAIN

CN-TTYP-XXSL-A1

Specifically engineered to optimize Eagle Transmission, the XX SL Eagle Transmission Flattop Chain features a unique flat top. Not only does this shape maximize shifting performance and robustness, but it also contemporizes the look of your super bike, especially with its outer plate cut outs that push the strength-to-weight ratio to an unprecedented level.

—

Flattop specifically engineered for Eagle Transmission

Ultimate shifting performance, game-changing aesthetics

Super-light outer plates with cut-out design (Not suitable for E-MTB)

XX EAGLE TRANSMISSION FLATTOP CHAIN

CN-TTYP-XX-A1

The first thing to know about the XX Eagle Transmission chain is that it's the strongest we have ever made. Specifically engineered to optimize Eagle Transmission, this all-new T-Type design features a unique flat top, not only does this shape maximize shifting performance, but it also contemporizes the look of your super bike. Utilizes our longest-wearing hard chrome finish and hollow pins.

—

Strongest SRAM chain ever

Specifically engineered for Eagle Transmission

Flattop profile, smooth-shift bottom profile

Ultimate shifting performance, game-changing aesthetics

Longer-wearing, Hard Chrome finish and hollow pins

X0 EAGLE TRANSMISSION FLATTOP CHAIN

CN-TTYP-X0-A1

With Eagle Transmission being the first of its kind, fully integrated and interdependent system, the X0 Eagle Transmission (T-Type) Flattop Chain is so much more than just a chain. Specifically engineered to optimize Eagle Transmission, shift whenever you want performance is now possible. Its unique flat top design makes it the strongest change chain we have ever made. With equal importance, it upgrades the look of any super machine. These details matter. It features a Dark Polar finish specific to X0 comes with a PVD coating for unbelievable resistance to corrosion and wear. Fully approved for E-MTB use with solid pins.

—

Strongest SRAM chain ever

Specifically engineered for Eagle Transmission

Flattop profile, unbelievable shifting performance, game-changing aesthetics

EAGLE TRANSMISSION POWERLOCK

CN-PLCK-TTYP-A1

Designed for use with T-Type chains, the Eagle Transmission PowerLock provides the same rugged dependability as its predecessors.

GROUPSETS

XX SL EAGLE AXS TRANSMISSION GROUPSET

GS-XX-SLE-D1

The pinnacle of cross-country cycling performance can be found in the new XX SL Eagle AXS Transmission groupset. Built to serve the most demanding rider's needs in the lightest weight configuration, XX SL Transmission is the evolution of our World Champion, World Cup winning XX Eagle AXS. The new XX SL Eagle Transmission derailleur is more robust thanks to our hangerless interface and features familiar technologies like our overload clutch and AXS pairing process. The new XX SL Transmission cassette is a major reason why Eagle Transmission offers the best-ever inboard and outboard shifting performance under load. Thanks to its full X-SYNC design, the harder you pedal, the better it shifts. In addition to X-SYNC technology and re-imagined gear progression, it is also our lightest Eagle cassette ever. Still the lightest ISO certified crank on the market, the XX SL Transmission cranks are maximized for title winning stiffness and feature the remarkable new XX SL Eagle Transmission (T-Type) direct mount chainring. Specifically engineered to optimize Eagle Transmission, the XX SL Eagle Transmission Flattop chain features a unique flat top. Not only does this shape maximize shifting performance and robustness, but it also contemporizes the look of your super bike. XX EAGLE AXS TRANSMISSION GROUPSET

GS-XX-E-D1

With the perfect balance of robustness and weight savings, the XX AXS Transmission groupset has the strength to handle big enduro days with the weight to make it manageable. Our all-new Transmissions take a holistic approach to a bicycles shifting, an entire system synchronized, providing you with a superior ride experience. Shifting under load is made possible on the XX cassette due to a combination of X-SYNC technology and cassette mapping, creating seamless shifts even during your hardest power output. The XX DUB cranks are based on our proven design from years past, feature our new T-Type rings and are compatible with our new Quarq power meters. For more rugged terrain the XX rings are compatible with our removable bashguard(s). Specifically engineered to optimize Eagle Transmission, the XX Eagle Transmission Flattop chain features a unique flat top. CHAINRINGS

EAGLE TRANSMISSION DIRECT MOUNT CHAINRING

CR-TTYP-DM-D1

Rugged durability comes naturally to the Eagle T-Type direct mount chainring. Finished with a distinct, dual-spoke design and bash guards. Available in four different tooth counts, there is ample room to refine and customize your bike’s feel.

—

8 Bolt direct mount

32-38T range

0 and +3mm offset variants

Compatible with T-Type chains

EAGLE TRANSMISSION THREAD MOUNT CHAINRING

CR-TTYP-TM-D1

Designed for use with our new XX SL power meter, these replacement rings are purpose made for use with our new proprietary spider design. This chainring mount system allows us to reduce weight without compromising reliability. Available in four different tooth counts, there is ample room to refine and customize your bike's feel.

EAGLE TRANSMISSION E-MTB CHAINRING 104 BCD

CR-TTYP-104-A1

Designed for use with a 104 BCD interface of any 104 BCD spider, This chainring utilizes our T-Type design and is backwards compatible with Eagle technology (X-SYNC II). SRAM drivetrain engineers optimized this ring to combat the high-torque, high-wear situations e-bike riders face. The aggressive tooth design provides better chain retention for a smoother, more efficient pedal feel with a focus on long wear-life.

XX EAGLE TRANSMISSION DIRECT MOUNT E-MTB CHAINRING FOR BOSCH

CR-XX-BO-D1

Designed specifically for use with Bosch motor systems, this chainring is the lightest, most advanced e-specific ring ever designed. Pairing performance and design aesthetic without compromising longevity, the ring is also compatible with our Aero-Guard for compliance with EN 15194.

—

A perfect combination of lightweight ALU and the durability of a steel running surface

Compatible with Bosch motor systems

AeroGuard Compatible

XX EAGLE TRANSMISSION DIRECT MOUNT E-MTB CHAINRING FOR BROSE

CR-XX-BR-D1

Designed specifically for use with Brose motor systems, this chainring is the lightest, most advanced e-specific ring ever designed. Pairing performance and design aesthetic to give you the highest end E-MTB ring we produce, the ring is also compatible with our Aero-Guard for compliance with EN 15194.
